

Service Offering

RKON's SIEM - Unlock the complexity of your Threat Management and Response planning.

Discover the Most Critical Threats to your organization

With advanced machine learning and automated data analysis techniques, RKON's real-time security analytics will help you detect advanced threats. With focused and driven threat contextualization, your team can focus on the most critical issues, saving resources by focusing less on unimportant ones.

Stop Insider Threats

RKON SIEM platform continually develops new User Behavior Analytics (UBA) including behavior profiling, statistical analytics and advanced correlation which means you continually stay ahead of any new threats. This helps you shut down compromised accounts as soon as you see them, identify privilege abuse and stop user-based threats.

Detect Network and Endpoint Irregularities as they occur

Get full visibility into all your processes, executables and behavior to detect compromises. Ultimately, this cuts the cost, time and scope of cyber incident response and ensures you are one step ahead of cyber adversaries.

Empowering your search capabilities with Power and Precision

RKON's search technology gives you fast results regardless of whether you're investigating an incident or hunting for threats. The platform's capabilities empower you to search with unstructured criteria which helps streamline search creation and result analysis.

Preplan and Automate Incident Response

With the option of pre-staging automation actions, your team can handle threats quickly using collaborative workflows. This enables your team to track detection and response times which helps to optimize processes over time.

Compliance management

RKON provides a complete set of security controls that can be executed in a compliance as a service model, preserving capital expenditure and minimizing investment down to what you need to be compliant. These tools can be provided in a flexible format and scaled up or down based on your changing needs.

Why RKON?

Experience: RKON provides comprehensive security solutions to some of the fastest growing organizations in North America—managing the security for 75,000+ users spanning more than 100 companies.

Depth: The solution set is also the same security that protects RKON's award-winning cloud. RKON was voted one of the Top 100 MSP Providers in North America two years in a row.

Quality: The solution set is based on the Magic Quadrant leaders: Check Point and LogRhythm. RKON was the first Certified Check Point Managed Service Provider in North America.

Auditor Experience: RKON is experienced in negotiating with auditors and compliance firms.
