

Case Study: Private Equity

vCISO, Compliance Readiness, and Risk Reduction

BACKGROUND

Global Private Equity firm with over thirty companies in their current portfolio representing multiple industries and services.

THE CHALLENGE

After suffering a ransomware attack with one of their investment companies, the private equity firm wanted to assure this would not happen to other companies within their portfolio. The private equity firm did not have a solid understanding of the security posture within their investment portfolio of companies.

THE SOLUTION

RKON provided a low-cost ISO 27001 Assessment to get a consolidated view of risks and controls spanning the entire portfolio's IT, OT, ICS and connected devices.

This current state assessment of controls allowed RKON to assess their maturity level and risks across the entire portfolio of companies.

In addition, RKON performed Application and Penetration Testing, IncidentResponse and Forensics that identified critical or high vulnerabilities and provided pragmatic remediation guidance.

RKON included a Fractional vCISO for the Private Equity company to leverage on-demand security leadership as well as deliver a three year roadmap to assist with budgeting and project justification.

ENFORCED A ROBUST
SECURITY DUE DILIGENCE
PROCESS FOR PORTCOS

GDPR AND CCPA
COMPLIANCE READY

THE RESULTS

This Private Equity firm now has a security program that covers its entire portfolio and includes a robust security due diligence process when acquiring new companies.

The client fully understands privacy requirements and remediation activities, ensuring portfolio companies are prepared for GDPR and CCPA compliance.

ABOUT RKON

For over 25 years, RKON's human brilliance has driven our technology solutions, guiding customers to a fortified, Quiet IT environment. At RKON, we do that through a security-first approach that meets our customers where they are in their digital journey.
