

Sustainable Security Leadership Solution for Immediate Impact

Virtual Chief Information Security Officer Program (vCISO)

Comprehensive Team of Experts: From C-Level Leadership to Analysts, Supporting Your Organization at Every Level

RKON intentionally designed our Virtual Chief Information Security Officer (vCISO) program for organizations that need a comprehensive cybersecurity program but do not have the resources for an in-house team. With RKON's vCISO program, organizations can leverage expert security leadership and a supporting team of subject matter experts to solve unique cybersecurity challenges, ensuring peace of mind and proactive protection for your organization.
