

Secure AWS Engineering Essentials

FedRAMP Boot Camp

6-hour Remote Boot Camp

UNDERSTAND THE PROGRAM. Learn how FedRAMP unlocks new revenues and understand the commitment to attain and maintain an authorization to sell your solution to the US government.

Maximize Your Success

A successful FedRAMP program begins with company-wide understanding. All are encouraged to learn the most important FedRAMP topics, including:

- » FedRAMP: What, Why, and How it works
- » Anatomy of a FedRAMP program
- » Documentation package
- » Preparation and authorization process
- » Planning a successful program
- » Delivering Continuous Monitoring
- » Recommended next steps

Boot Camp includes guidance for early decisions:

- » First customer agency
- » System impact level
- » Cloud architecture choices

Boot Camp Audience

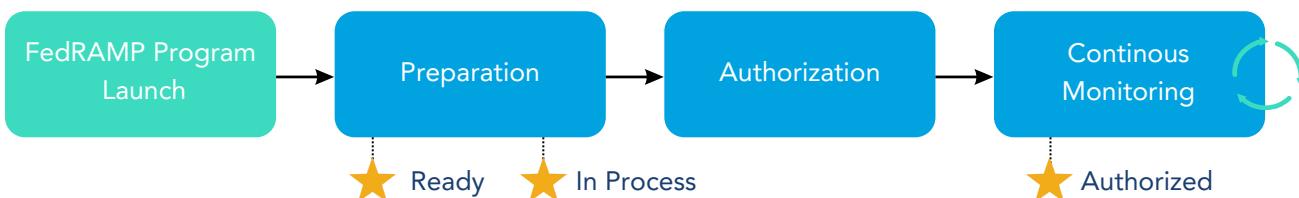

All team members are encouraged to join this session. Boot Camp assumes no prior FedRAMP knowledge.

Recommended: Executives, sales, management, product, and technical decision makers.

Outcomes

Attendees who complete the Boot Camp will understand:

- The structure of a FedRAMP program
- How to achieve & keep an authorization
- How to minimize costs and avoid problems

Why RKON

- **AWS security specialists, not generalists** — deep, hands-on cloud security expertise.
- **Security that actually ships** — advisory plus implementation, not just reports.
- **Compliance without the chaos** — FedRAMP, SOC 2, PCI, and more, done right.
- **Faster, secure AWS adoption** — reduce risk, cost, & operational drag.
