

Secure AWS Engineering Essentials

FedRAMP Program Launch

DEMYSTIFY FEDERAL COMPLIANCE AND UNLOCK NEW BUSINESS. Companies must demonstrate FedRAMP compliance to offer their products and services to the US government. The process can feel daunting for commercial companies under pressure to maintain business velocity.

Workload and Data Security

FedRAMP touches nearly every aspect of your business. Many variables influence the effort required to prepare a system for audit and authorization. From day one, our RKON specialists begin architecture, controls, and documentation reviews. Concurrently, our project managers begin aligning quality, schedule, cost, and scope with your expectations.

- ✓ Daily stand-ups, 2-week scrums
- ✓ Defined deliverables/milestones
- ✓ Iterative updates at a frequency you desire
- ✓ Optional interface with government sponsors

Why RKON

- **End-to-End Program Management:** From initial gap analysis to achieving your Authorization to Operate (ATO), RKON provides hands-on guidance, daily stand-ups, and iterative updates to keep your project on track.
- **AWS-Centric Solutions:** We secure, design, and engineer FedRAMP-ready architectures optimized for AWS, ensuring scalability and resilience.
- **Accelerated Time-to-Authorization:** Our structured milestones and proven approach reduce risk and shorten timelines, helping you unlock new revenue streams with U.S. government agencies and partners.
- **Security Without Compromise:** FedRAMP isn't just a checkbox—it's a validation of your commitment to the highest security standards. RKON ensures your platform meets these requirements while maintaining operational agility.

Program Milestones

RKON proposes milestones to measure completion of the FedRAMP process:

1. Completion of gap analysis for the Readiness Assessment Report
2. Design and engineering support for your FedRAMP - Compliant SaaS Environment
3. Platform is approved by the FedRAMP PMO, "FedRAMP Ready."
4. Documentation package is submitted to the 3PAO for assessment
5. Your platform has received a PATO or ATO from the FedRAMP PMO/Sponsoring Agency

Achieving FedRAMP authorization requires significant effort and proves your system meets top-tier security standards, opening doors to U.S. Government contracts and trusted partnerships.
