

FedRAMP Authorization Services

Full-Lifecycle Advisory and Engineering for FedRAMP High, Moderate, and LI-SaaS authorizations.

The Federal Cloud Opportunity

FedRAMP is the gate to the largest technology buyer in the world. Federal agencies are required to use FedRAMP-authorized cloud products, which creates a protected marketplace with limited competition, long contract cycles, and high switching costs. Once authorized, your product can join the FedRAMP Marketplace, giving every agency a pre-approved procurement path. Fewer authorized competitors and multi-year contracts compound over time, strengthening your position.

Readiness Review

3-week assessment with ROI projections, an investment justification, competitive analysis, and a go/no-go business case.

Boot Camp

6-hour workshop aligning execs, sales, product, and engineering on everything FedRAMP requires to prepare your team.

System Build

Architecture optimized for least total cost of ownership by eliminating unnecessary tooling and compliance-stack bloat.

System Design

Architecture optimized for least total cost of ownership by eliminating unnecessary tooling and compliance-stack bloat.

Documentation

Complete SSP and appendices built through detailed interviews with your team. Machine readable with document management.

ATO Support

Our experts support 3PAO coordination, POA&M remediation, and agency review management through authorization.

Countinuous Monitoring

Vulnerability scanning, POA&M tracking, annual assessments, significant change management, and ongoing agency coordination so your team can focus on selling to new agencies and expanding marketplace reach. Our experts do the heavy lifting.

Why RKON

» We build, not just advise

RKON engineers deploy infrastructure, write IaC, and integrate workloads alongside your team from initial design through authorization and ongoing operations. We don't hand you a findings report and leave, we stay embedded until it's done.

» Any cloud, deep expertise

- Microsoft Solutions Partner (IAM Specialization + 4 Designations)
- AWS Security Competency
- Google Cloud

Security Specialization (one of the first three firms globally). Your cloud platform choice does not limit your authorization options.

» Accelerator Kit

Proven IaC templates, SSP frameworks, and policy libraries drawn from 10+ years of FedRAMP engagements compress timelines by hundreds of hours and eliminate the blank-page problem. Every template is maintained as the program evolves.

» Designed for FedRAMP 20x

We build with automated, machine-readable evidence today so your system is ready for the new certification model without costly retrofits when the rules take effect. This includes code, controls, and machine-readable documentation.

"Your team can knock out in a few months what would take us a year or more to do."

— Jason Borinski, Director of Information Security, Dexcom
